

XAMAN EK'S VOYAGE

A informative project that teaches
kids about space junk.

Objective

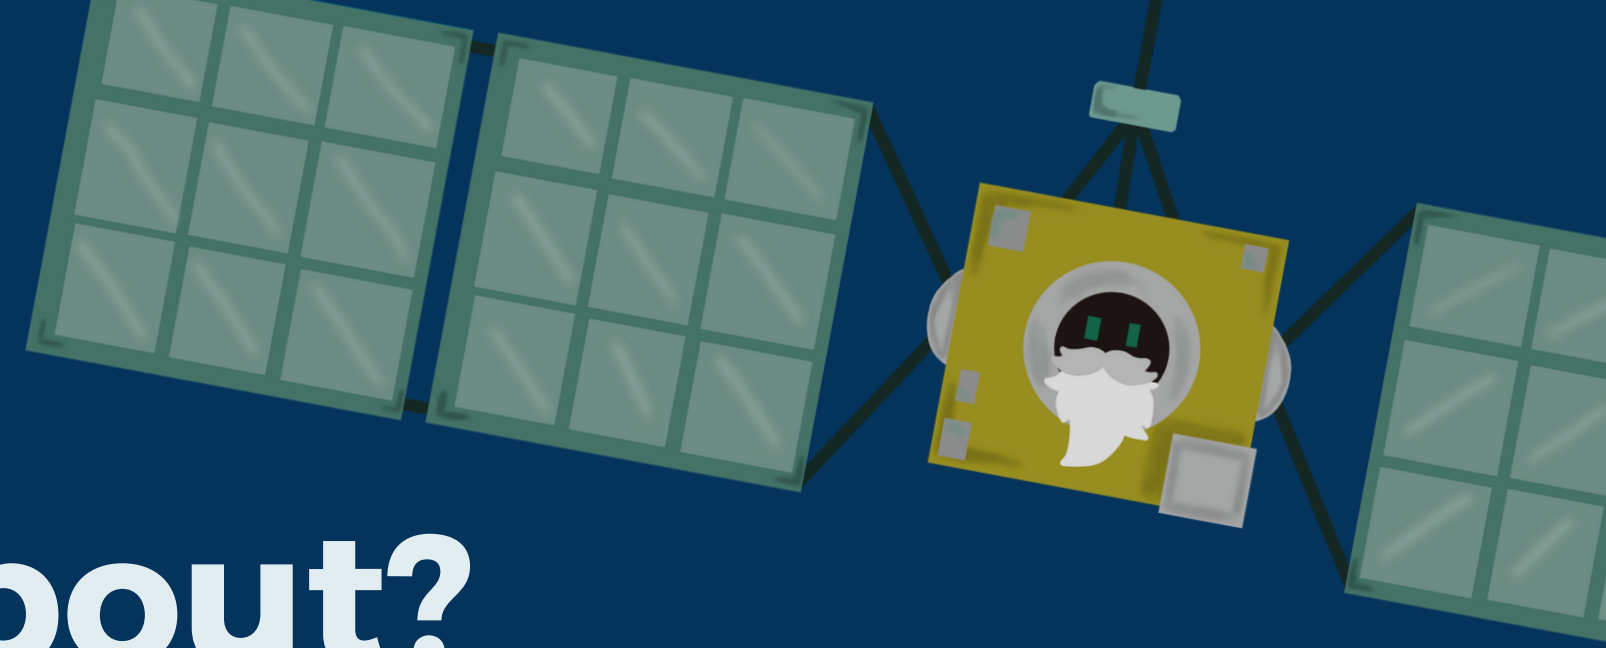

To inform our environment about NASA's space debris recovery initiatives. Among our main objectives is the dissemination of all kinds of information about the space in an attractive way for children. Our mission is to generate content that communicates about this problem in a pleasant way to instill the care that present and future generations give to their environment.

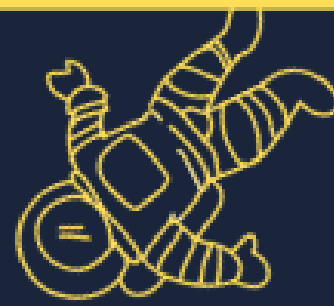

What is it about?

A Brief Introduction

1. User must download the app from the appstore
2. Then using the infographics included they shall scan the photos to access to the animated story and pictures from the topics reviewed.

WHAT IS SPACE JUNK?

BASIC CONCEPT

SPACE JUNK REFERS TO ANY PIECE OF MACHINERY OR EVEN DEBRIS LEFT BY HUMANS IN OUTER SPACE. IT MEANS THAT THESE WASTES ARE FLOATING AROUND DEEP SPACE HARMING THE NATURAL ENVIRONMENT.

TYPES OF WASTE

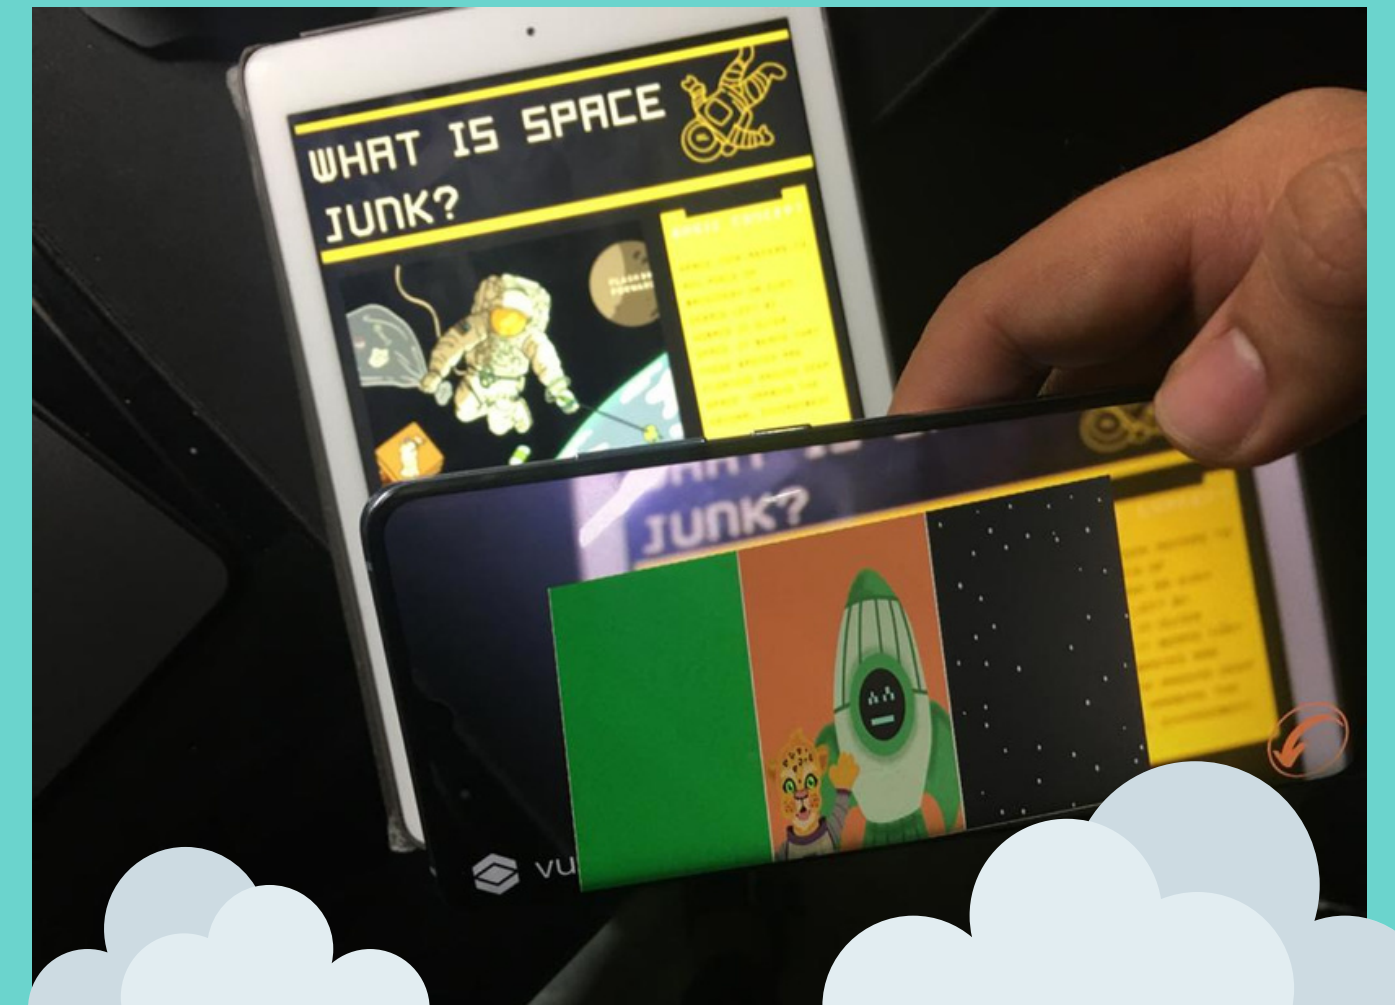

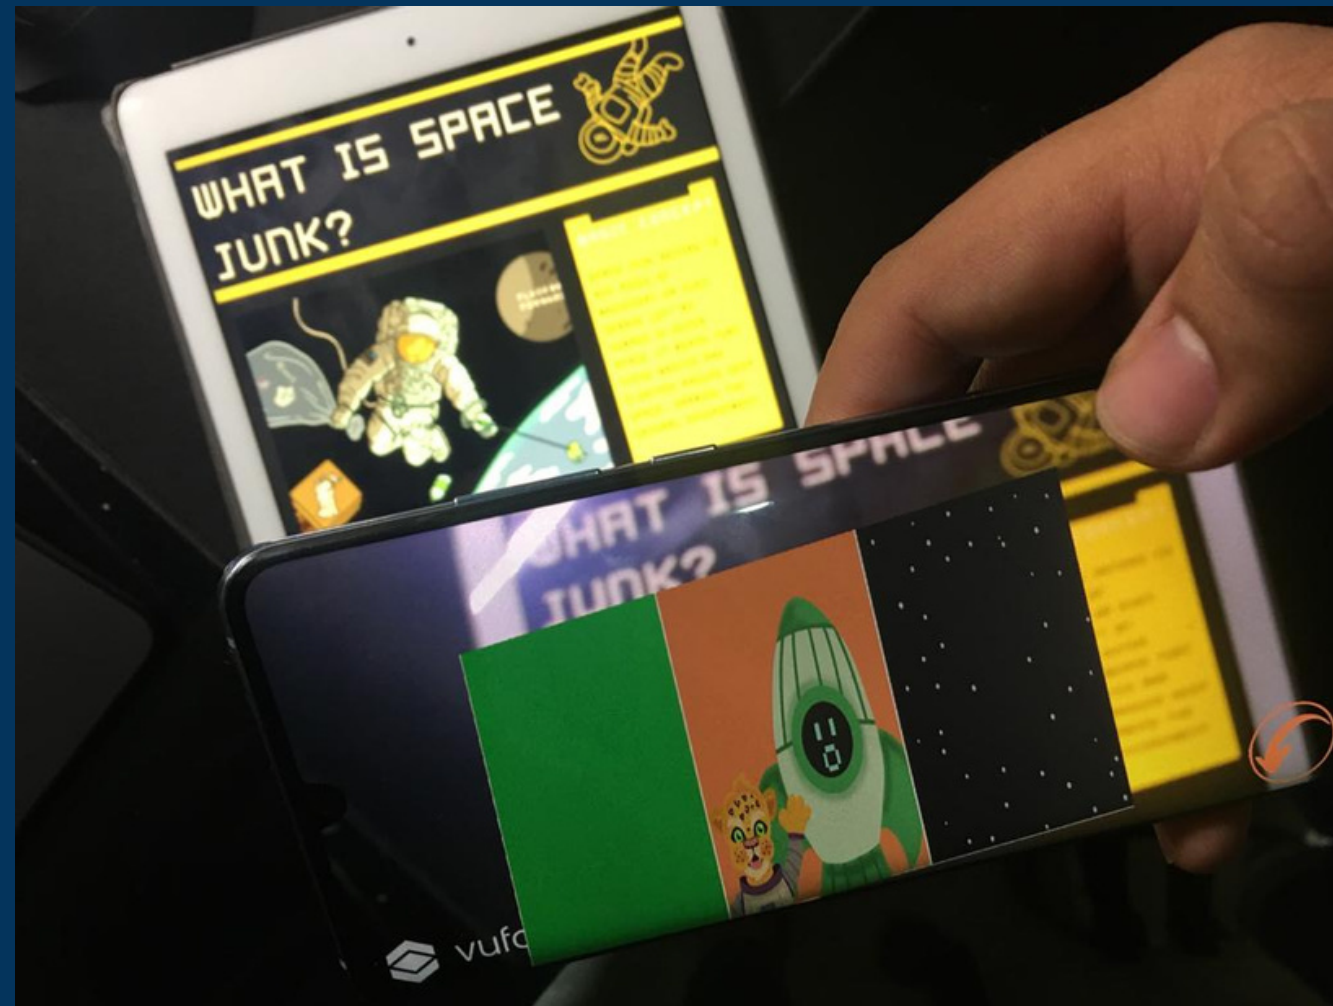

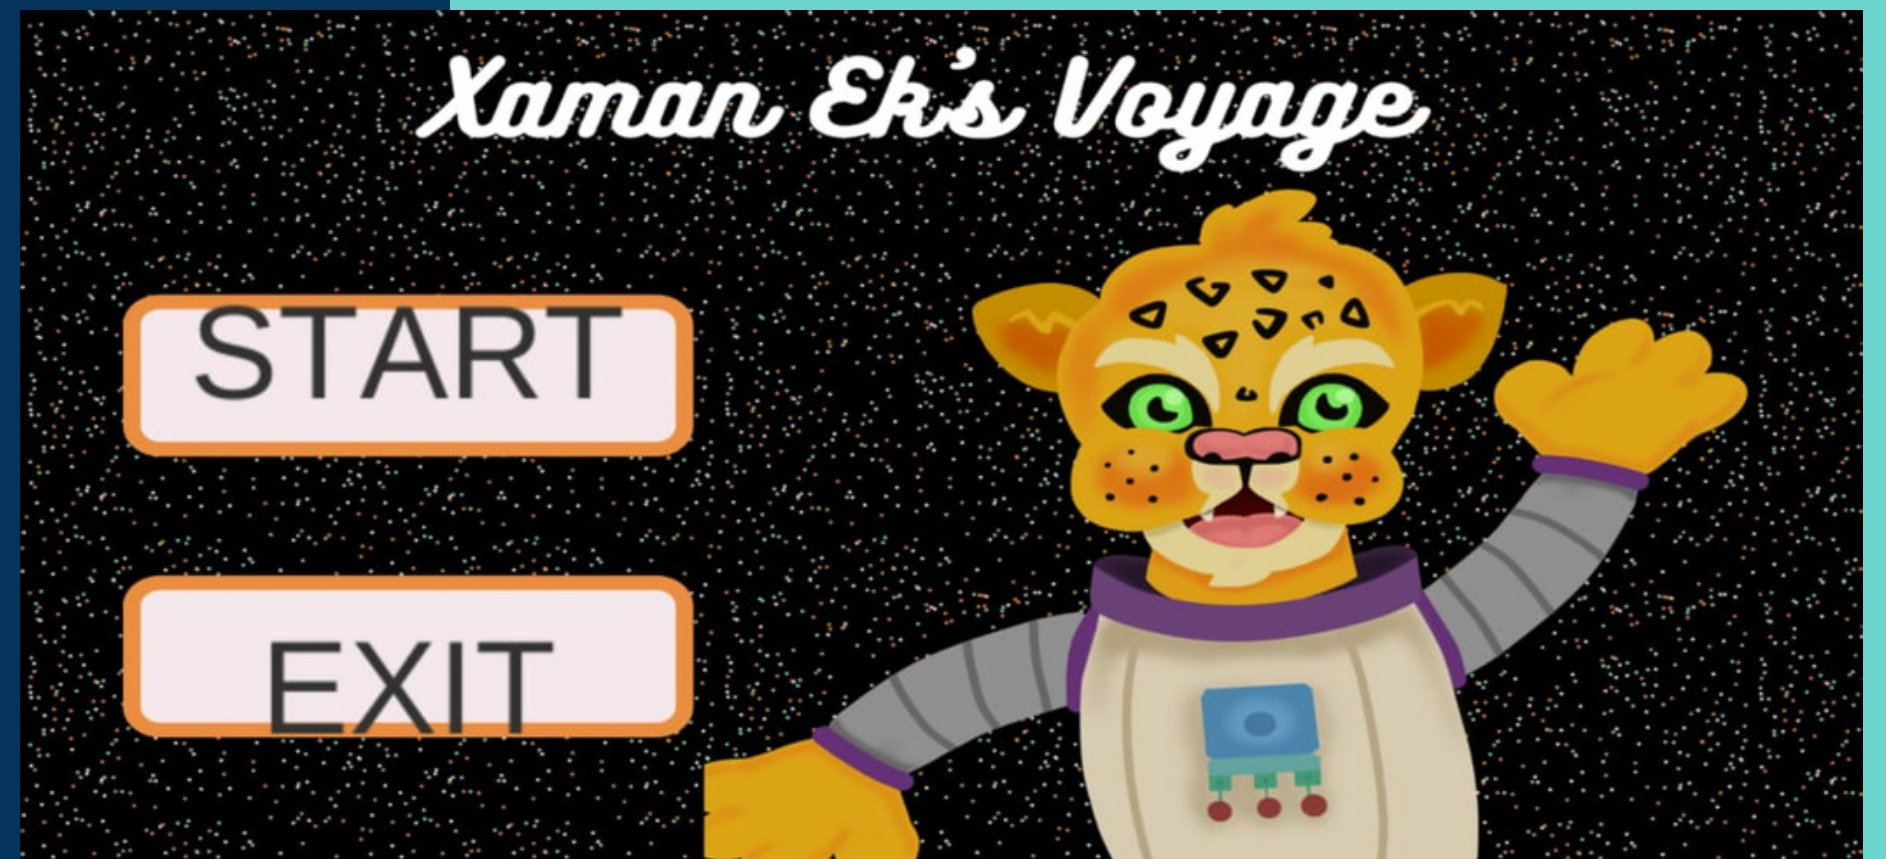

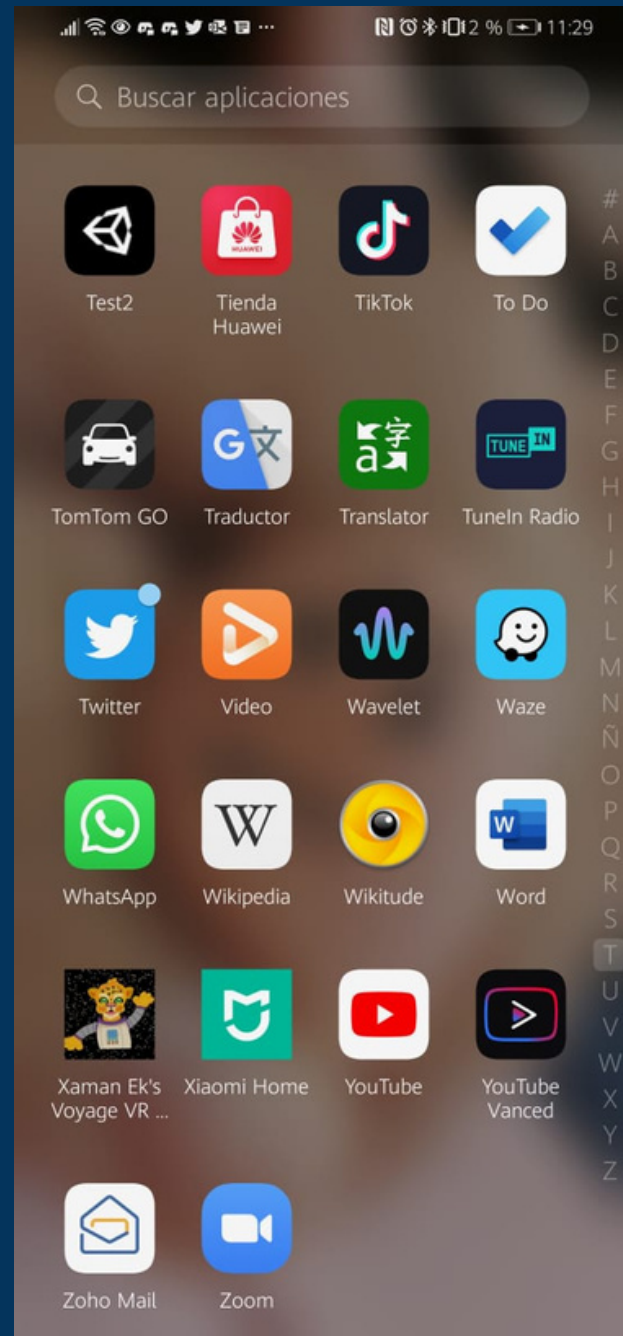

- Natural space debris: small pieces of cometary and asteroidal material called meteoroids.
- Artificial space debris: non-functional man-made object in space (usually orbiting the Earth).

Demonstration

Created by: Sergio González, Fernanda Gómez,
Norman Ávila and Sarah Chong.

**We are sure this app will
help to teach kids from a
different path than the
usual one. Making them
more prepared for future
problematics.**
